C2G

Discontinued - 14in Structured Wiring Enclosure with Cover

Part No. CG-37001

An efficient and effective distribution solution for your home or small office audio/video/telephony/control system. This structured wiring enclosure is the "home run" point of your system. Available in three sizes to accommodate needs ranging from an apartment to a large custom home, these boxes accept our structured wiring modules.

Enclosures feature cable tie points within the box to organize cables, plus knockouts for cable entry on top, rear or bottom. A knockout for an electrical "J" box is provided. This enclosure can be surface-mounted or flush-mounted. A matching high-impact metal cover is included with the boxes to protect enclosed equipment. Ideal for SOHO (Small Office/Home Office) and home theater installations.
