C2G

Discontinued - 500ft (152.4m) 12/2 Speaker Wire - In-Wall CL2-Rated

Part No. CG-43133

This is the right cable to install audio throughout your house. Made from 65 strands of 99.9% high-purity copper, this speaker wire is very flexible and unlikely to kink during installation. CL2-rated for use inside walls, this wire features twisted-pair conductors to make the wire much easier to pull throughout the house than flat or zip-cord style speaker wire.

Twisted pairs also help to cancel common-mode noise. The flame-retardant white PVC jacket helps to diminish the potential of fire spreading between floors. Inner conductors are color-coded for easy identification.

Features & Benefits

- In-wall, CL2-rated jacket
- 12 AWG stranded conductor construction
- Color coded conductors
