

This ceiling speaker is the perfect solution for K-12 classrooms, conference rooms or other learning, sharing and collaborating environments that require a sound reinforcement system for multimedia presentations, video clips, and movies. This ceiling mount configuration allows this speaker to be securely mounted within a drop ceiling or a wall. This speaker is built to an 80hm industry standard and integrates seamlessly with the TruLink® Audio Amplifier to provide a complete sound system. Additionally, this speaker can be combined with the TruLink® A/V controller and RapidRun® for a complete connected A/V solution.

Ceiling speakers mount easily for a clean, unobtrusive look while dispersing sound at 120 degrees for full coverage. Designed for long life, rubber surrounds and poly cone construction provide a durable solution that will not degrade over time compared with paper/foam constructed speaker components.

Note: This speaker is sold individually and not in pairs.

Features & Benefits

Industry standard 8 ohms design

Provides 120° of sound dispersion

Poly cones and rubber surround

Metal speaker grill
