

C2G RG6 Quad Compression F-Type Connector with O-Ring Multipack (50-Pack) (TAA Compliant) Part No. CG-41079

Quickly becoming the standard in satellite and cable television installation, our compression connectors provide reliable connections with a high resistance to moisture. High frequency, these are compatible with digital cable and satellite. The bright nickel finish withstands harsh environments, and reduces the effects of oxidation.

An o-ring in the nut and a tapered plastic ferrule provide a barrier to moisture migration through the threads and under the cable jacket that would otherwise damage the cable. Use item #38011, our 3-in-1 compression tool, for easy installation.

Features & Benefits

Reliable connections with high resistance to moisture C

Ensures reliable and secure connections for satellite and cable television

Reduces the effects of oxidation, maintaining signal quality

Easy installation with the use of the 3-in-1 compression tool, saving time and effort.

Compatible with digital cable and satellite

Durable bright nickel finish withstands harsh environments, ensuring long-lasting performance

O-ring and tapered plastic ferrule prevent moisture migration, prolonging the lifespan of the cable
