

**C2G**  
**50ft (15.2m) Cat6 Snagless Solid Shielded Ethernet Network Patch Cable - Blue**  
Part No. CG-43167

This shielded snagless Cat6 cable is perfect for use with our [HDBaseT Products](#) or with any other application where long length shielded cable is required. This cable is optimized for superior performance in noisy environments and is designed to handle bandwidth-intensive applications. This cable is designed to meet Cat6 TIA/EIA and ISO/IEC standards for patch cable performance. Each individual pair is bonded together to help maintain the twist-spacing throughout the cable right up to the termination point. The cable design minimizes Near-End Crosstalk (NEXT) levels and features high quality solid conductors, full cable shielding and is terminated with a snagless boot & shielded plug. The combination of the shielded plug, shielded cable, snagless boot and solid conductors provides superior performance over standard stranded conductor patch cables when used with HDBaseT solutions.

## Features & Benefits

|  |                                      |
|--|--------------------------------------|
| HDBaseT Certified                            | 4- pair solid conductor construction |
| Overall cable shield and shielded connectors | Snagless connector design            |

## Specifications

### General Info
