This Cat5e shielded network patch cable is an ideal solution for making a network connecting in a noisy, EMI/RFI, environment. The F/UTP shielding features an overall cable shield which provides protection from EMI/RFI noise and electromagnetic interference. This cable meets or exceeds industry standards for NEXT and return loss. The molded boot provides extra strain relief and durability. Available in a variety of colors to easily color-code your network installation.

Please Note: For maximum protection against EMI/RFI interference, use our Cat5E shielded patch panel (#03864) and Cat5E shielded keystone jacks for complete end-to-end protection.
