

The Apple MacBook adapter kit offers the connections you need while on-the-go. Bringing your own device to a meeting or presentation is an everyday occurrence, being able to connect to nearly any display is crucial. The USB-C to HDMI and USB-C to VGA adapters allow the Apple MacBook to connect to a VGA or HDMI input of a projector, monitor, or HDTV. Whether you are out in the field presenting, at home streaming movies, or hot-desking this adapter kit brings you the light-weight, portable, and simplified connectivity that you need.

USB-C to HDMI and USB-C to VGA Adapters

Ensure that you have the ability to connect your Apple MacBook device to nearly any display. On-the-go, presenting, or in a meeting you never know what connections will be available when you are setting up. There is no need to install or update drivers, no need to plug into power, and no need to call IT, just plug in the desired adapter and waste no time inspiring your audience.

Note The Apple MacBook is not included in this kit.

Features & Benefits

Adapt a USB-C output to HDMI or VGA

Low profile and light-weight design

Plug and Play—no driver required
