The USB-C Male to USB-A Male Cable - USB 3.2 Gen 1 (5Gbps) is the perfect solution for connecting any standard USB-C enabled device to a USB-A device or accessory for charging and data transfer.

Ensure that a USB-C equipped laptop, smartphone, or tablet has a full charge and ready to go from the 3A charging output while simultaneously transferring photos, music, or data at speeds up to 5 Gbps. With a transfer rate of up to 5Gbps, it is fully backward compatible with USB 3.0, 2.0, and 1.1 devices.

The symmetrical design of the USB-C connector is identical on both sides, so it does not matter if you plug it in upside-down or right-side-up. It will plug in the first time, every time, while preventing damage to the connector port. There is no need to worry about software or drivers to install. The plug-and-play feature makes it simple to connect and start using right away.
