

## Hospital Grade Power Cords (NEMA 5-15P to NEMA 5-15R)

### Outdoor rated extension power cords

Power cords used in hospitals and other medical settings must conform to strict standards for grounding reliability, assembly integrity, strength and durability, as well as regulatory standards such as NEMA and IEC specifications. These standards are in place to ensure that power cords are safe and reliable for use in demanding hospital environments. The Hospital Grade power cord selection from Cables To Go offers one of the broadest selections available on the market. This line is outdoor rated to provide sunlight resistance and wet weather rating compliance. This is the perfect solution for power extension in outdoor or wet areas, maintenance or cleaning equipment and temporary power extension for equipment relocation.

The female 5-15R connector plugs directly into the mating male power cord while the male Hospital Grade 5-15P connector plugs into a Hospital Grade supply outlet. Performance is guaranteed through a lifetime warranty, so performance is never an issue. Easily recognizable through the Green Dot mark, these Hospital Grade power cables ensure compliance and maximum performance.

#### Features:

- Outdoor rated orange color visibility
- Available in 16AWG gauge
- Hospital Grade UL & CSA certification
- Complete selection of length and gauge stock availability
- Input: NEMA 5-15P connector
