

## Hospital Grade Power Cords (NEMA 5-15P to ROJ)

### Replacement power cords for Lab Equipment

Power cords used in hospitals and other medical settings must conform to strict standards for grounding reliability, assembly integrity, strength and durability, as well as regulatory standards such as NEMA and IEC specifications. These standards are in place to ensure that power cords are safe and reliable for use in demanding hospital environments. The Hospital Grade power cord selection from Cables To Go offers one of the broadest selections available on the market. This offering is the ideal solution for replacing overused or misplaced power cables, or to optimize office or lab layout with a cable that is the perfect length. The Remove Outer Jacket (ROJ) configuration is designed for non-detachable powered equipment that is typically found in a laboratory environment.

The ROJ end is directly wired into the device while the male Hospital Grade 5-15P connector plugs into a Hospital Grade supply outlet. Cables are available with black or clear connectors to match any environment or hospital standard. Performance is guaranteed through a lifetime warranty, so performance is never an issue. Easily recognizable through the Green Dot mark, these Hospital Grade power cables ensure compliance and maximum performance.

Note: The wiring of this power cord to any device should be performed by certified personnel only.

#### Features:

- Optional black or clear 5-15P connector color selection
- Available in 16 & 18AWG gauge selections
- Hospital Grade UL & CSA certification
- Complete selection of length and gauge stock availability
- Input: NEMA 5-15P connector  
Output: ROJ
- Lifetime warranty

#### Applications:

- Perfect for hospital, doctor's office, dentist office, or any other healthcare facility requiring direct wired Hospital Grade power connections for:
  - Lab equipment

<b>Item#</b>	<b>Description</b>
