Unique Features - Great Value - Guaranteed Satisfaction

The Classic Series™ offers a complete line of A/V cabling and wall plates designed for cost-sensitive education applications. Classic is a perfect fit for tight spaces in Classrooms, Boardrooms, Conference Rooms and Auditoriums.

- **Now better than ever** - Classic has a smarter design that allows for more room in the gang box.

Cleaner Box – Easier Installation and Better Termination

- Low-Profile Connectors Extend Cable Life - Extra Room in the electrical box decreases the chance of signal degradation due to extreme bends or wear and tear from constant contact with other cabling
- Lighter connector heads are less likely to disconnect from the wall plates – no re-termination required

YOU CHOOSE! Our Connector vs. The Competition

Wall Plates That Give You More Room

The only pass-through wall plates available with the VGA connections on the bottom of the plate.

- Eliminates sharp bends
- Creates more room for other cables in the same gang box

Designed for Plenum or General-Purpose Applications

- CMP: For Plenum installations in vulnerable environments
- CMG*: For general purpose installations through track, raceway, surface mount or in-wall requiring CL2 / CL3 (US) or FT4 (Canada)

"As an AV Systems Integrator, we strive to provide our clients with the best quality at affordable prices, and because we primarily serve the K-12 marketplace, meeting budgets is crucial...The low cost and high quality of the Classic Series™ were essential in helping me decide to choose it for the project. The Classic Series™ cables and wall plates were easy to install, and the product performs perfectly."

- Dave, *United Digital Integrators, Inc.*
