

Breaks the speed and IRQ bottlenecks that hamper many of today's PCs. Combining both serial and parallel port acceleration on one PCI bus card, the LavaPort-Plus provides you with a single board (and shared IRQ) solution for all your I/O connectivity needs. Its two 16650 UART serial ports (one 9-pin and one 25-pin) transmit data up to 460.8 kbps, four times faster than Com ports in most PCs.

The enhanced parallel port accelerates connection with parallel devices by a factor of three.

With this one card, users can connect 56k or ISDN external modems, digital cameras and more, and get speed increases of 50-100%, while a parallel device such as a zip drive or scanner can see a three-fold increase in performance. Faster performance, multiple ports, the LavaPort-Plus has it all!

Specifications

General Info

Product Line	C2G	Color	Beige
Type	Adapter, Cable		

Dimensions

Cable Length	0.5 ft
--------------	--------

Technical Information

Cable Type	Adapter	Adapter Rear	5-pin Din Male
Adapter Front	PS/2 Female
