C2G
Discontinued - Lava™ Port-Quad 4-Port PCI 16650 DB9 Serial Card
Part No. CG-26803

This PCI bus 4-port serial accelerator card configures 4 COM Ports on the faster PCI bus, and supports data throughput rates up to 460.8 kbps on each port. Primarily a server product, the LavaPort-Quad provides an excellent and cost-effective remote access solution. The LavaPort-Quad's PCI architecture enables all four ports to share one PCI bus IRQ, even when accessed simultaneously, and thus saves valuable resources for other expansion cards. Addressable for any COM I/O address, the card provides greater flexibility in serial port setups.

Its integrated 16650 UART represents the next generation of UART technology, and each port uses an expanded 64-byte FIFO buffer with software-configurable Tx/Rx triggers, 4X clock, and on-board flow control, that guarantee errorless data transmission even at top speed. A The LavaPort-Quad ensures better and faster connectivity.

Specifications

General Info

Product Line	C2G		Color	Silver
Type	Accessory			

Technical Information

Adapter Front	DB9 Male, DB9 Male, DB9 Male, DB9 Male
