

Connect advanced performance gaming systems, DVD player, D-VHS, S/PDIF, Dolby® Digital®, or DTS® for high quality digital sound and video for your home theater applications. This cable is manufactured from high quality optical fiber with a polished lens and corrosion-resistant, 24K gold-plated collar. A 1mm low loss core conductor and inner clad prevent phase error and noise, and also ensure low distortion and high signal-to-noise ratio to maintain high fidelity. The 24K gold-plated OFC connectors deliver all the detail, color and brightness you expect from your s-video component.

The stylish, ultra-flexible PVC jacket enhances cable durability for years of audio/video enjoyment. For the ultimate experience, connect from your advanced performance gaming system to a quality home theater and large-screen display. Protective plastic cover protects lens from dust, dirt and other debris while a non-slip rubber grip connector enables easy installation.
