

The HDMI over Cat5 extender allows HDMI audio/video signals to be extended over a single Cat5/Cat5e/Cat6 unshielded twisted pair network patch cable up to 300ft at a 1080p resolution. This solution is compatible with any operating system and is truly plug and play with no drivers or software required. The transmitter and receiver are available in either a wall plate or box form factor and are interoperable, meeting the needs of the installation environment. In addition, this solution utilizes TruChoice™ power, which allows power to be supplied over the Cat5 cable to both the transmitter and receiver from a single power adapter placed at either the transmitter or the receiver end of the solution. HDBaseT technology supports HDCP and allows the Extended Display Identification Data (EDID) signals, i.e. communication of the display's capabilities, to pass through the extension solution ensuring that the content from the source is sent at the optimal resolution for the display. Built-in power surge protection and high ground loop immunity ensure high performance signal extension.

Features & Benefits

Extend HDMI up to 300ft at a 1080p resolution

Utilizes a single category patch cable for extension

Includes Decora style and single gang wall plate options

HDBaseT technology supports HDCP and EDID pass through

TruChoice™ power allows for power at the transmitter or receiver end

Specifications

General Info

Product Line	C2G	Color	White
UPC Number	757120292241	Country Of Origin	Taiwan, Province Of China
Application Sector	Commercial	Type	Active Device, HDBaseT, Transmitter
