

C2G Discontinued - TruLink® VGA + Stereo Audio over Cat5 Extender Box Four Port Transmitter Part No. CG-29369

The TruLink® VGA + Stereo Audio over Cat5 Four port transmitter allows VGA video and Stereo Audio signals to be extended over two Cat5/Cat5e/Cat6 unshielded twisted pair cables to up to 4 displays at up to 300ft at up to a 1920x1200 video resolution. The receivers are available in either a wall plate or box form factor and are interoperable with this transmitter allowing this solution to meet the needs of the installation environment. In addition, this solution utilizes TruChoice™ power providing the flexibility to power at either the transmitter or receiver end. TruPair™ technology allows the Extended Display Identification Data (EDID) signals, i.e. communication of the display's capabilities, to be communicated, ensuring that the content from the source is sent at the optimal resolution for the display. Built-in power surge protection and high ground loop immunity ensure high performance signal extension.

Features & Benefits

Extend VGA and Stereo Audio to up to four displays at up to 300ft at a 1920x1200
resolutionUtilizes two category cables for extensionTruPair technology ensures compatibility with any monitorTruChoice Power allows for power at transmitter or
receiver end
