C2G
Discontinued - 8-Port UXGA Monitor Splitter/Extender (Male Input)
Part No. CG-29552

Perfect for small scale digital signage systems, the 8-Port UXGA Monitor Splitter/Extender, allows the video signal from a single VGA source to be distributed to up to eight monitors while maintaining vivid picture quality at a video resolution of up to 1600x1200. Though powerful, this splitter is easy to use; simply connect the cables and the power supply, and it is ready to go! There is no software required, or complicated interface cards to install. This monitor splitter not only distributes, but also boosts high resolution video signal up to 210 feet.

This splitter/extender includes power-saving mode, color-coded connectors for the input and outputs, durable all-metal housing, power and activity LED indicators. Also suitable for XGA, SVGA, VGA, and MultiSync® resolution monitors, this solution fit a wide variety of applications. Multiple units may be daisy-chained together to support even more outputs.

Please Note: The term "extender" refers to the product's ability to extend the distance of your cable runs to 210 feet. It does not imply that the product provides "extended desktop" functionality, or the ability to view a different video signal on each monitor. To add extended desktop capabilities to a computer, please consider a USB to Video Adapter.

Replacement power supply part number #98033.

Features & Benefits

Split a single VGA signal from a PC to eight or more displays

Combine multiple splitters to display signal to even more displays

Available in 2, 4 and 8-port versions
