

C2G

**Discontinued - 25ft (7.6m) Ultima™ HD15 Male to RCA HDTV Component Video Breakout Cable**

Part No. CG-29643

The Ultima cable optimizes style, quality, and value in a cable specially designed for high performance. Constructed from three individually shielded, 75 Ohm coax cables, this cable delivers a performance connection that maximizes color and image. The cable features 100% shield with an overlapped foil and copper braid. The shield continues through the connector with a 360° solder joint between the cable braid and a copper foil wrap on the HD15 aluminum undermold, providing a shielding solution for a noise-free connection. This design assists in reducing EMI/RFI interference to meet FCC requirements. 24k gold-plated connectors provide maximum oxidation resistance for error-free data transfer. Finally, an ultra-flexible jacket and oversized thumbscrews make installation easy.

Please Note: This cable is not compatible with Y/Cr/Cb video, and is not compatible with all computer monitor ports. Make sure your graphics card supports Y/Pb/Pr component video or that your video source provides a Y/Pb/Pr component video signal from the HD15 port to use this cable.

## Specifications

### General Info

Product Line	C2G	Color	Black
Application Sector	Commercial, Residential	Warranty Type	Lifetime
Type	Cable		

### Dimensions

Cable Length	25 ft
--------------	-------

### Technical Information

Cable Type	Breakout, Video	Adapter Rear	RCA Component Video Male
Adapter Front	VGA Male
