

These connectors offer excellent video transmission for today's demanding audio/video and home theater applications. They are constructed with 24K gold plating that provides low loss signal transfers and resists deterioration. Uses a two-piece construction that saves installation time. These easy-to-use connectors receive RG6 18 AWG wire, and make custom cable lengths a breeze. Termination is easy: simply insert the center conductor into the pin and secure with the set screw, and then solder the braid to the strain relief. Each package contains four yellow-coded connectors for quick visual identification.
