

The Trulink® USB to HDMI® and VGA Adapter is a flexible solution for connecting laptops or desktops to monitors and/or displays using both analog (VGA) and digital (HDMI) signals. Connect both HDMI and VGA to view the same content across two displays using the included USB cable, while enjoying stereo audio through the HDMI and/or 3.5mm audio connection. The adapter supports primary, extended, mirror and rotated displays modes and allows for the addition of up to 6 displays with minimal configuration and without any additional graphics cards. Not only is the adapter simple to use and cost-effective, it's also bus-powered so an external power cord is not required. Its compact size also makes it portable so you can use it anywhere.

**Input:** One USB Mini B Female

**Output:** One HDMI Female, One VGA Female, and One 3.5mm Audio Female

## Specifications

### General Info

Product Line	C2G	Color	Black
Application Sector	Commercial, Residential	Warranty Type	1-Year
Type	Extender		

### Technical Information

Adapter Rear	HDMI Female, VGA Female, 3.5mm Stereo Female	Adapter Front	USB Mini-B Female
