Distribute audio and video to classrooms, exhibits, tradeshows, demonstrations and multimedia presentations. This monitor splitter broadcasts your computer's audio and video output to four destinations. Daisy-chain more than one splitter to expand the number of monitors and speakers you can reach. With the built-in video signal enhancement, you can place monitors up to 210 feet away while maintaining your video quality.

Use the 3.5mm audio outputs to drive either speakers or earphones. Suitable for XGA, SVGA, VGA, and MultiSync® resolution monitors. From use in test bench facilities, data centers and help desks to video broadcasting, our splitter/extender delivers both performance and value.

Please Note: The term "extender" refers to the product's ability to extend the distance of your cable runs to 210 feet. It does not mean the product provides "extended desktop" functionality, or the ability to view different information on each of your monitors. If you are looking to add extended desktop capabilities to your computer, please consider product #30534, 6in USB 2.0 to XGA Adapter. UXGA provides a screen resolution of 1600 x 1200 pixels.

Features & Benefits

Four VGA and Stereo Audio inputs and one VGA and Stereo Audio output	Supports up to a 2048x1536 resolution
Extends VGA video and stereo audio up to 210 feet	Durable metal construction
