

C2G

Discontinued - 25ft (7.6m) Composite Video and Stereo Audio Cable with Low Profile Connectors M/M - In-Wall CMG-Rated

Part No. CG-40116

Audio/video installations in educational and commercial settings often require in-wall rated cable. Our CMG-rated line was specifically engineered to meet this requirement while overcoming common challenges faced by installers in these environments. Low-Profile connectors (1.41in total depth) save valuable space in the gang box.

This cable is constructed from three 75 Ohm coaxial cables using 26 AWG center conductors and features a tinned copper braid that provides 92% coverage over a foil shield. This design protects the cable from any EMI/RFI interference and ensures that the highest quality signal is transferred for optimal audio/video performance.

CMG-rated cables meet many NEC requirements for Communications Cables General Purpose In Wall Use. Our cables meet the following ratings: CMG, FT4, CM, CL3, CL2, CMX, CL3X, and CL2X.

Always check with your local authority on building requirements to verify cable requirements before beginning any installation.
