

Distribute analog video signals from a single a/vs ource to up to four TVs, monitors or receivers with this powerful distribution amp. Supporting cable runs up to 150 feet, this amplifier can be daisy chained together for an unlimited number of television connections without degradation to the picture quality. Unity gain technology ensures that the output signal is as clean as the input signal.

high quality and stable amplification to eliminate the poor picture and sound quality you get by simply using Y-cables. Use these amplifiers with video sources such as DVD players or satellite receivers and with audio sources such as CD players and tuners for multizone sound systems. Ideal for nightclubs, banks, airports, boardrooms, and schools. The uses are endless!
