

Quickly customize the length of your home theater or broadcast video cables with these connectors. Nickel-plated brass provides years of reliable service. Barbs within the connector centerpin provide a reliable signal path, and ensure a positive connection to the cable's center conductor. These connectors are a breeze to install and more reliable and easier to use than traditional hex crimp BNC connectors.

Simply prepare the cable in the same manner as an f-type connector, insert the connector onto the coax cable and compress it with the 3-in-1 compression tool (item #38011).

Note: Item 41122 must be installed on a RG59 dual shield cable that has an outer diameter between 5.4mm and 6.1mm.

## Features & Benefits

Provides a reliable connection which is resistant to moisture Compatible with broadcast video and CCTV Surveillance signals

Designed for use with dual shield RG59 cable

## Specifications

### General Info

Product Line	C2G	UPC Number	757120411222
Country Of Origin	Taiwan, Province Of China	Application Sector	Commercial, Residential
Warranty Type	Lifetime	Type	Connector

### Buy American Act Compliance

TAA Compliant	Yes
---------------	-----

### Technical Information

Adapter Front	BNC Male
