

C2G
Discontinued - 6ft (1.8m) Velocity™ Composite Video with Stereo Audio Cable - Retail-Packaged
Part No. CG-45391

The Velocity composite video with stereo audio cable provides improved picture and sound quality when compared to ordinary "out of the box" cables. Use it to connect the composite audio signal from the left and right channels on your home theater equipment as well as the video. The low-loss 100% spiral-wound oxygen-free copper shielding offers protection against noise and interference. Twisted pair oxygen-free copper wire and foam dielectric are optimized for audio clarity and video imaging, and prevent EMI/RFI noise and interference.

The braid shield protects against unwanted noise and interference while providing clear, noise-free, vivid picture quality. The color-coded molded connectors attach to an ultra-flexible jacket, and enable easy installation and identification. The 24K gold-plated, durable connectors ensure long-lasting quality; fully molded connectors provide excellent strain relief.
