

TruLink[®] Video to PC Converter

Converts S-Video or Composite Video to VGA

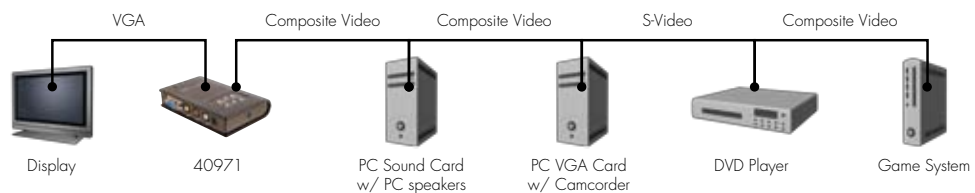

The TRULink Video to PC Converter uses the latest de-interlace chipset on the market to offer a truly high-quality picture. Using this converter you can watch videos or play video games on your PC monitor. The Video to PC Converter will accept S-Video or composite video signals and convert them to high-resolution computer images. No software is required and connecting this device is a breeze. Within minutes you can be watching your DVD collection, satellite receiver or be playing a video game console on any PC. The converter has a small footprint, so it's easy to fit in tight spaced - also great for traveling. The built in switch offers convenient switching between the PC devices connected to the converter and your PC.
