

Impact Acoustics Agile Audio/Video RF Modulator

Programmable Universal Modulator Distributes Audio/Video over an RF system

The Impact Acoustics Agile Modulator accepts Audio/Video input from various sources and modulates the signal to a CATV/UHF channel of your choosing. Watch your DVD player, satellite receiver, or CCTV surveillance camera on any television in your home. Imagine flipping to a channel on your TV and being able to see who is at your front door or finish watching a DVD movie you started in a different room.

The Impact Acoustics RF Modulator is designed for easy installation. Simply connect any Audio/Video device, choose an unused CATV/MATV channel and connect the RF Modulator to your home RF system. Multiple Impact Acoustics Programmable modulators may be cascaded to distribute multiple inputs.

Application:

- Add a surveillance device to any display that has a built-in tuner and be able to program it to a broad range of channels
- Add a DVD player/recorder or video game system to an older television where RCA inputs are not available

Common Uses:

- Home/Business/Schools
- Restaurants/Bars/Clubs
- Retail stores

Features:

Programmable Channels: CATV 64~94, 100~125, UHF 14~69
