C2G

6ft (1.8m) USB to DB25 Parallel Printer Adapter Cable

Part No. CG-16899

Use this adapter cable to connect your inkjet, laser or high speed printer to a computer without a parallel port. Forget the hassles of IRQ sharing by adapting your printer to USB. If you have multiple printers, you can eliminate the need for a switchbox by connecting each printer to a USB port.

The device is fully transparent to the user and is ideal for true bi-directional communication. This adapter auto-negotiates hardware recognition for faster protocol setup, and is fully plug-and-play compatible. This adapter cable is a perfect accessory for Microsoft® Surface® products and other leading laptops.

Note: This adapter is designed for use with a standard Parallel printer and is not designed to support multi-function printers or other parallel devices. This adapter uses the USB Printing Support function of the operating system and is not designed to create a LPT port.
