

This wall mount speaker is the perfect solution for K-12 classrooms, conference rooms or other learning, sharing and collaborating environments that require a sound reinforcement system for multimedia presentations, video clips, and movies. The wall mount configuration allows this speaker to be securely mounted to a wall or other flat surface. This speaker is built to an 80hm industry standard and integrates seamlessly with the TruLink® Audio Amplifier to provide a complete sound system. Additionally, this speaker can be combined with the TruLink® A/V controller and RapidRun® for a complete connected A/V solution.

Wall mount speakers work best in rooms with sharp angles, room partitions (alcoves) or in rooms where ceiling mounting is not a practical option. These speakers disperse sound at 120 degrees for full classroom coverage. Designed for long life, rubber surrounds and poly cone construction provide a durable solution that will not degrade over time compared with paper/foam constructed speaker components.

Note: This speaker is sold individually and not in pairs.

Features & Benefits

Wall mount configuration, for secure mounting to a wall or other flat surface

Built to an 80hm industry standard

Speakers disperse sound at 120 degrees for full sound coverage

Rubber surrounds and poly cone construction provide a durable solution that will not degrade over time
