

Perfect for situations where two HDMI devices must share a single HDMI input on a display, this HDMI auto switch provides for hassle free operation. The power required for operation of this switch is provided from the HDMI source devices, so no separate power adapter is required*. With the wealth of devices now using HDMI, it is easy to run out of free HDMI inputs on an HDTV or home theater receiver. This HDMI selector switch solves the problem by providing additional high-definition digital inputs for sources including Blu-ray™ and DVD players, gaming systems, and high-definition cable/satellite boxes.

The auto switching functionality provides for a system that is easy to use, while manual switching functionality is available for situations where more control is desired. The auto switching feature is able to sense when a new device is connected or powered on and will automatically switch to that port. When the device is disconnected or powered off, then this feature automatically switches to the first connected device. In situations where two devices are connected to the switch and powered on, or sending an HDMI signal to the switch, the Select button on the top of the switch may be used to switch back and forth between the two inputs.

Please note: Most HDMI source devices are able to provide the necessary power for the operation of the HDMI switch; however, in some situations the power supply of the HDMI source device is insufficient and additional power is required. In those situations, power for the HDMI switch may be supplied using C2G's HDMI Voltage Inserter ([CG42223](#)) or USB Powered HDMI Voltage Inserter ([CG42236](#)).

Features & Benefits

HDMI auto switch: Allows two HDMI devices to share a single HDMI input on a display.

Hassle-free operation: Provides easy and convenient switching between HDMI devices.

Additional high-definition digital inputs: Provides extra HDMI inputs for Blu-ray™ and DVD players, gaming systems, and cable/satellite boxes.

Power supply options: Can be powered by most HDMI source devices, but additional power may be required in some situations.

Simplifies HDMI device connectivity: Allows multiple devices to be connected to a single HDMI input, reducing the need for multiple cables and connections.

Easy to use: The auto switching feature ensures seamless switching between devices without the need for manual intervention.

Saves space: Eliminates the need for multiple HDMI inputs on a display or home theater receiver, freeing up space for other devices.

Versatile compatibility: Works with a wide range of HDMI devices, including Blu-ray™ and DVD players, gaming systems, and cable/satellite boxes.

Convenient control options: Offers both automatic and manual switching options, providing flexibility based on user preferences.

Specifications

General Info

Product Line	C2G	Color	Black
UPC Number	757120403494	Country Of Origin	China
Application Sector	Commercial, Residential	Warranty Type	5-Year
Type	Active Device, Switch		

Dimensions

Product Width US	3.39 in	Product Height US	0.83 in
Product Length US	1.73 in		

Listing Agencies / 3rd Party Agencies

FCC Compliant	Yes
