

The Pro HDMI to VGA and Audio Converter is an ideal solution for connecting newer laptops or computers that output an HDMI signal to a legacy display, such as projectors or monitors, which accept a VGA and 3.5mm stereo audio input. This device converts the digital HDMI A/V signals to an analog VGA video and stereo audio signal. Many products on the market, particularly cables, claim this capability; however, most of these products only "adapt" from HDMI to VGA. Without an active conversion process, there are very few devices that are able to output an analog VGA and audio signal from an HDMI output.

The Pro HDMI to VGA and Audio Converter is an active device which converts a digital HDMI signal to an analog VGA video and stereo audio signal. This product is easy to use with no software or drivers required. Simply connect the unit and enjoy high definition content on an analog display. The durable metal housing protects the converter and provides for a long life. For added convenience, this device is bus powered from the HDMI port, so no additional power source is required. A 3.5mm stereo audio output is also included so that audio can be enjoyed through the display.

Features & Benefits

Converts HDMI signal to VGA and stereo audio: This device allows you to connect newer laptops or computers with HDMI output to legacy displays that accept VGA and 5mm stereo audio input.

Active conversion process: Unlike many other products on the market, this converter actively converts the digital HDMI signal to an analog VGA video and stereo audio signal, ensuring compatibility and high-quality output.

Easy to use: No software or drivers are required to use this converter. Simply connect the unit and start enjoying high-definition content on an analog display.

Durable metal housing: The converter is housed in a durable metal casing, providing protection and ensuring a long lifespan.

Bus powered: The converter is powered directly from the HDMI port, eliminating the need for an additional power source.

Compatibility: This converter allows you to connect newer devices with HDMI output to older displays that only accept VGA and stereo audio input, expanding your options for display connectivity.

High-quality output: The active conversion process ensures that the VGA video and stereo audio signals are of high quality, providing a seamless viewing and listening experience.

Convenience: With no software or drivers required, this converter is easy to use and can be set up quickly. It also eliminates the need for an additional power source, making it a convenient solution.

Versatility: The inclusion of a 5mm stereo audio output allows you to enjoy audio through the connected display, enhancing your multimedia experience.

Specifications

General Info

Product Line	C2G	Color	Black
UPC Number	757120407140	Country Of Origin	China
Application Sector	Commercial, Residential	Warranty Type	5-Year
Type	Active Device, Adapter, Converter		

Dimensions

Product Width US	1.69 in	Product Height US	0.91 in
Product Length US	2.56 in		

Listing Agencies / 3rd Party Agencies

CE Certified	Yes	FCC Compliant	Yes
