

Quickly customize the length of your home theater or broadcast video cables with these connectors. Nickel-plated brass provides years of reliable service. Barbs within the connector centerpin provide a reliable signal path, and ensure a positive connection to the cable's center conductor. These connectors are a breeze to install and more reliable and easier to use than traditional hex crimp BNC connectors.

Simply prepare the cable in the same manner as an f-type connector, insert the connector onto the coax cable and compress it with the 3-in-1 compression tool (item #38011).

Features & Benefits

Barbs within the connector centerpin for reliable signal path More reliable and easier to use than traditional hex crimp BNC connectors

Saves time and effort in customizing cable length

Durable material for years of reliable service

Ensures a strong and reliable signal connection

Simple and hassle-free installation process
