

4-Port USB 2.0 Hub Cable with USB Mini-B

Connect three USB 2.0 devices and one USB mini-B device to your computer with just one cable

The Cables To Go™ 4-port USB 2.0 Cable Hub is a unique hub that is very portable. It fits into any brief or carrying case for your convenience. The cable-type design saves space with the small form factor, and is self-powered. It connects up to four USB 2.0 devices with just one cable. The USB “mini-B” male plug is ideal for connecting your digital cameras, camcorders, and USB flash memory card readers while the three USB “A” female ports can be connected to devices such as printers, speakers, keyboard, and mice just to mention a few etc.

Application:

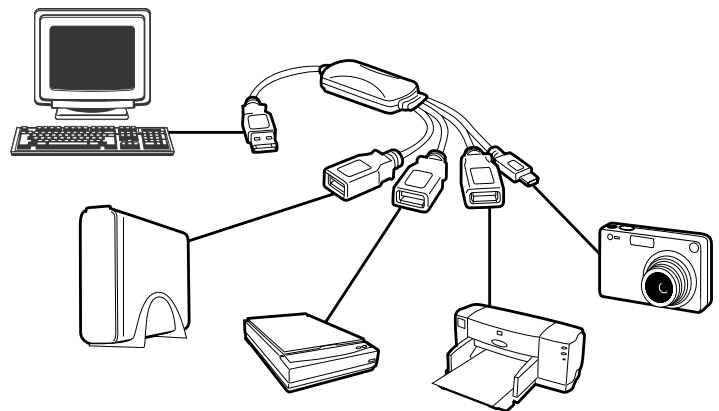

- Connect all-in-one and photo printers
- Connect digital cameras and flash memory card readers to USB mini-B
- Connect mice and keyboards
- Connect to KVM switches
- Connect to USB powered speakers

Common Uses:

- Educational Institutions
- Home Offices
- Office Buildings

Specifications:

- Compliant with USB 2.0 specifications
- Operates up to 480Mbps for faster data transfer
- Hot swappable means you can easily switch from device to device without rebooting your PC
- Bus powered – no external power adapters required
- Small form factor
- Compatible with both PC and Macs and USB 2.0 specifications
- One year warranty
