

USB SuperBooster Wall Plate

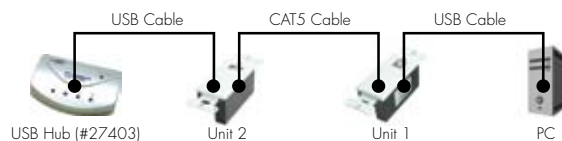

Decora® style wall plate with integrated transmitter/receiver
sends a USB signal up to 150ft over Cat5

Conquer USB length limitations and put your USB camera, projector, printer or other USB devices where you need them with the USB SuperBooster Wall Plate from Cables To Go. This wall plate solution extends the distance of a USB device to a host computer up to 150ft. The USB SuperBooster Wall Plate is powerful yet simple, and is compatible with any computer that supports USB without the requirement of specific software.

This plug-and-play device consists of a transmitter and receiver unit incorporated into two, single gang Decora compatible wall plates. The transmitter/receiver pair is connected via standard Cat5, Cat5e, or Cat6 UTP cable. Use pre-terminated network cables or pull unterminated cable and use the included tool-less IDC RJ45 connectors. This device is perfect for education, home office and restaurant/bar installations.
