Wireless USB to VGA with Integrated Audio Kit

Transmit video and audio to a projector, television, or monitor

The TruLink USB to VGA with Integrated Audio Kit includes everything you need to wirelessly stream video and audio from your computer to a remote monitor, projector, or television. Utilizing Ultra-Wide Band technology, the USB to VGA with Integrated Audio Kit enables in-room wireless connectivity at distances up to 30 feet between the computer and the display equipment. This highly secure wireless connection is ideal for classroom or conference room presentations or to display content from your laptop to your home entertainment system.

Specifications:

- Video and Audio support in a single device adapter, delivered wirelessly from a computer to an external display
- Supports high resolution UXGA/WSXGA video and 3.5mm stereo audio
- Works in both extended desktop and dual monitor screen modes
