

TruLink™ HDMI™ Repeater

Extend the length of your HDMI Connection

Overcome typical cable length limitations and place your equipment where you wish. The HDCP-Compliant HDMI Repeater from Cables To Go. regenerates and equalizes the HDMI signal to ensure clear delivery over longer cable runs. Use a single repeater to reach up to 130 feet, or add a second repeater for a total length of 200 feet! To ensure maximum performance we recommend using our premium SonicWave™ High Speed HDMI cables.

The HDMI Repeater features a Female-to-Female connection for use with standard HDMI cables. Simply run one HDMI cable from the video source to the HDMI repeater. Connect a second HDMI cable from the repeater to the display.

A specially designed inline HDMI power supply allows the HDMI Repeater to be powered from an outlet near the source device. The power supply connects to the source device via HDMI, delivering power to the repeater via the HDMI cable.

Specifications:

- HDMI (v1.3 with support for Deep Color, CEC, x.v.Color™, lossless multi-channel surround sound)
- Extend HDMI signal up to 200ft using SonicWave High Speed HDMI Cables
- Unique voltage inserter (included) allows power supply to be placed at source
- Supports full 1080p high definition video
- Simple design and connections
- Fully HDCP compliant

Common Uses:

- Home Theater • Home Offices • Office Buildings
