

TruLink® HDMI® Over Cat5e Extender

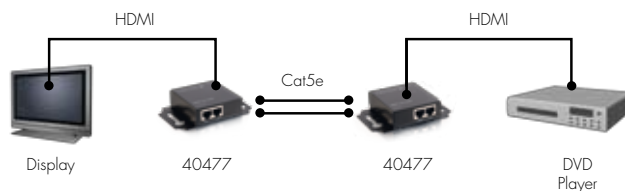

Extend your HDMI signal up to 60m over Cat5

The TruLink HDMI Over Cat5e Extender allows you to extend your HDMI signal up to 60m (200ft) over two Cat5 unshielded twisted pair (UTP) cables. This solution is ideal for applications where your HDMI monitor needs to be placed further than the average 10m HDMI cable limitation. Driving a HDMI signal over Cat5 allows you to take advantage of your UTP cable infrastructure already installed, for a cost effective and reliable installation.

The HDMI over UTP solution is ideal for applications that require you to place your HDMI compatible display in a remote location. This is common in large home installations or digital signage applications, including retail stores, houses of worship, classrooms and board rooms where you need video presentation in one room but want the source to be out of sight and in a safe and secure environment. With the TruLink HDMI Over Cat5e Extender, you can place your display across the room, in another room, or on another floor while your source remains in a convenient location.

Specifications

- HDMI v1.3 with Deep Color, x.v. color™, high-speed refresh rates, and lossless multi-channel surround sound
- Supports the following resolutions using Cat5* cabling: 40m – 1920 x 1080 (1080p 12bit); 60m – 1920 x 1080 (1080i); 60m – 1280 x 720 (720p)
- Supports HDCP
- Power Supply: DC 5V 1A
