

TruLink® Multi-Function Converter with Tuner and Picture-In-Picture

Turn your LCD or Plasma monitor into a home theater display

Easily connect your video devices, including DVD players, camcorders, VCRs, and even Cable TV, directly to your plasma or LCD flat panel monitor! The perfect solution for a crowded dorm room, small apartment or home office! Make your PC monitor a dual-purpose screen for both computer and TV video. The converter accepts s-video or composite video signals and converts them to VGA. Connect a cable television feed and watch television programs on your computer monitor. Picture-In-Picture (PIP) allows you to watch content on your monitor in a separate window while surfing the internet, paying bills or doing school work. The pass-through function sends VGA video directly to the monitor from your computer when the converter is powered down. MTS stereo output via a 3.5mm stereo jack is compatible with Dolby® Pro-Logic™ for a complete theater experience.
