

3x5 Component Video Matrix Selector

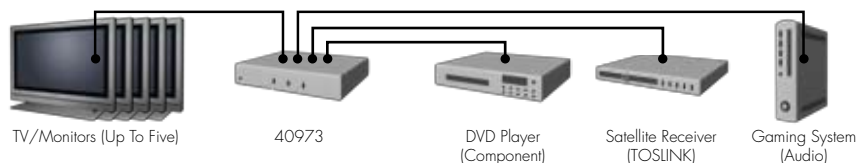

3 Input/5 Output Component Video, stereo and TOSLINK® audio, plus RS-232 control

The ultimate controller for high definition and progressive scan video sources, this Impact Acoustics HDTV selector allows you to route any of three source devices to each of five TV/monitors or one source to all five TV/monitors. Connect all your HDTV products such as DVD players, satellite receivers, cable set-top boxes, or gaming systems and use the remote control, RS-232 control or front panel buttons to watch any picture on any of five plasma, CRT, LCD or projection televisions with complete independence!

This matrix switch offers three component video inputs, three stereo audio inputs, and three optical digital audio TOSLINK inputs. It will switch all of these inputs to any of the five outputs, with the audio following video. The matrix switcher comes complete with an infrared remote control that features discrete commands to make programming complex macros into your universal remote control system a snap. RS-232 control option allows seamless integration into more sophisticated control systems. Now you can take control of your system and watch what you want where you want, and do it with no compromises!

Specifications

- Component Video Inputs: 3 (2 Rear, 1 Front), Component Video Outputs: 5 (Rear)
- Compatible with all interlaced or progressive scan analog component video signals
- Audio Input: 3Vp-p, Audio Input Impedance: 10k Ω , S/N Ratio: 65dB
- Video Component Input Impedance: 75 Ω , Video Bandwidth: -3dB@300MHz

Item#	Description
40973	3x5 Component Video Matrix Selector

Note: Unit does not convert L/R audio to TOSLINK or TOSLINK to L/R audio.
