

## TruLink™ DVI and USB KVM with audio

*Control up to four computers with one DVI monitor, USB keyboard, mouse and speaker set*

The TruLink™ DVI and USB KVM with Audio allows you to control, access, and boot multiple USB-enabled multimedia computers. The DVI connections support both digital video input (flat panel displays, data projectors, plasma displays, and digital TVs) and analog video input (traditional monitors and TVs). In addition, this switch provides two USB ports for device sharing. The TruLink DVI and USB KVM switch provides multi-platform for PC, Macintosh® G3/G4 and iMAC®.
