

Keystone Matrix

A/V Keystones

Our keystone snap-in modules provide a full range of solutions for voice, home networking, home office, audio/video and more. With the wide selection of snap-in modules, you can custom-configure your keystone wall plates and patch panels for greater control and more flexibility.

Stainless Wallplate Keystones

These stainless steel wall plates are designed with a plastic spacer that makes the keystone jack appear flush to the face. A variety of jacks and connectors will fill the wall plate openings to meet your specific requirements for voice, data, audio, video, fiber optic, etc. The inserts are a snap to install and remove, so that you can enjoy a highly adaptable system.

White/Ivory Keystones

With a wide selection of snap-in modules, our flush-mount keystone wall plates will fulfill the most complicated station installation requirements. A variety of jacks and connectors will fill the wall plate openings. Since the inserts are a snap to install and remove, you can have a highly adaptable and professional-looking cabling system. Plus, we provide write-on designation labels with holders for easy identification among different systems or stations.

Cat3/Cat5e/Cat6 Keystones

Designed for superior performance, this keystone jack will work with Cables To Go wall plates and surface boxes or any standard keystone and angled multimedia wall plate or patch panel. Available in 9 colors to match housing or allow color-coded port designation in compliance with TIA-606 requirements. Each keystone jack includes 110-type IDC straight-back termination with strain relief caps, and comes standard with 50µ inch gold plating on the jack contacts.

Surface Mount Keystone Box

Ideal for surface mount applications, especially in confined spaces. Mount for either side or base entry of cables. Boxes come with mounting screws and adhesive tape, and a cable tie for strain relief. The snap-on cover enables easy closure or access for quick installation. Each box includes a write-on label with holder for easy designation of different system or station.

Balun Keystones

This video balun provides an economical alternative to coaxial cable for video installations. It provides the necessary 75 Ohm impedance to a video device while providing 100 Ohm impedance to the cabling infrastructure. This balancing of impedances allows the video signal to travel with little to no degradation of signal up to 1500 feet over unshielded twisted pair (UTP) cable. Save installation time by sharing existing UTP network cable for video applications. The RJ45 female connector provides a quick method of connecting the balun to an existing UTP wall plate with RJ45 termination.

A/V Keystone Wallplates

Add the finishing touch to audio/video installations with a decorative feed-through wall plate. This wall plate is stamped from sturdy 20 gauge stainless steel, and is designed to mount in standard electrical boxes or mud rings. The thick stainless steel composition provides better protection than plastic wall plates in commercial environments where constant wear and tear causes damage. Feed-through connectors and identification markings make this wall plate simple to install and easy to connect equipment.

RapidRun® Keystones

RapidRun is designed to be the standard for in-wall audio/video installations. The RapidRun system empowers you to customize your installation to create your own ideal audio/video solution. Break-away flying leads and wall plates ensure flexible, efficient, high quality connections for all types of equipment. Constructed from aluminum for durability, this wall plate has a locking connector that enables the integrator to save valuable space inside the surface mount or electrical box that typically is already packed with cables.
