

## TruLink® HDMI® over Cat5

- Extend HDMI video and audio at a 1080p resolution up to 300 feet over a single Cat5 cable
- Utilizes HDBaseT® technology to support 3D, EDID pass through, Deep Color and other HDMI features
- TruChoice™ power allows for full operation using a single power supply placed at either the transmitter or receiver

The A/V over Cat5 product form factors are interoperable which means that all of the transmitters on this page are compatible with any of the receivers. This system allows a box transmitter to box receiver, box transmitter to wall plate receiver, wall plate transmitter to box receiver, or wall plate transmitter to wall plate receiver configuration.
