

1.5ft RapidRun® HD15 + 3.5mm + Composite Video + Stereo Audio Flying Lead

Use with a multi-format runner for projectors and any display requiring an HD15, 3.5mm audio and RCA audio/video connection

RapidRun is designed to be the standard for in-wall audio/video installations. The RapidRun system allows for customization of installations creating an ideal audio/video solution. Break-away flying leads and wall plates ensure flexible, efficient, high quality connections for all types of equipment.

RapidRun Multi-Format represents the most significant upgrade to the RapidRun cabling solution to date. With enhanced engineering that includes individually shielded pairs and an isolated ground for audio lines, this solution meets the rigorous demand for applications in which multiple audio/video devices are run over a single cable. In classrooms, for example, teachers commonly need to connect a laptop and DVD player to the classroom's projector. With multiple outputs on each piece of equipment (VGA, 3.5mm audio, composite video and dual RCA audio), providing a single cable to distribute these signals saves installation time and money for the integrator, the installer and the school.

With the advent of the "Analog Sunset" in 2014, digital solutions are being developed to expand the RapidRun Multi-Format line. These solutions make this innovative system ideal for environments where analog equipment will eventually be upgraded. Ideal for educational and institutional installations, this flying lead sends PC video, 3.5mm stereo audio and RCA composite audio/video over one cable. It is commonly used on the display (projector) end of classroom setups, with the corresponding wall plate used at the teacher's station.

Please note: Each complete RapidRun Multi-Format solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Features:

- Color code: Orange (for use with multi-format runners)
- Delivers crisp video and high fidelity audio from source device to display
- Integrates all technology in the room with a single cabling system—laptops, projectors, DVD players, interactive whiteboards and more
- Warranty: Lifetime
- Color: Black
- Length: 1.5ft
- Mfr: Cables To Go
- Weight: 0.41lbs
