

C2G
Discontinued - 10ft (3m) DVI™ Dual Link + USB 2.0 KVM Cable
Part No. CG-14178

This precision-engineered all-in-one bonded cable organizes and simplifies cable runs. The DVI-D dual link configuration provides enough bandwidth for resolutions up to 2048 x 1536 pixels, and allows high speed digital transmission up to 9.9 Gbps. The connectors are color-coded to match the ports on your personal computer or laptop, thus ensuring a simple connection.

Shielded undermold plus tri-shielding and braid shield protect against unwanted EMI/RFI interference. Gold-plated contacts provide full conductivity with no data loss. The black cable jacket disappears behind your desk to leave a clean organized look without the clutter and mess you'll have with ordinary individual extension cables. PC-99 color-coded connectors for easy installation.

Please Note: DVI-D supports digital signal only.

Features & Benefits

Convenience of having all the cables under one jacket

DVI-D cable supports resolutions up to 2048 x 1536

USB can carry both the keyboard and mouse for the KVM

Specifications

General Info
