Wiremold OFR series Overfloor Raceway System provides four-channels of capacity and access to a wide range of power, communications, and A/V connectivity options in the smallest, lowest, narrowest, ADA compliant profile available in overfloor raceway systems. This system installs over existing floor coverings and is both tamper-resistant and installer-friendly, making it an ideal solution for relocatable or permanent installations where access through floors and ceilings is not an option. Divided four-gang device box. Allows multiple services (power, data, A/V) at a single point-of-use. Side facing device mounting provides low profile, with space for large cable bend radius. Accepts OFR series device plates. Removable divider can be aligned with any of the raceway channels.

## Features & Benefits

Lowest profile overfloor raceway available in the industry

Attaches directly to floor covering, no need to alter carpeting, tile or wood

Multiple channel base provides space for power, communications and A/V requirements

Installs in open space areas where in-floor or ceiling distribution are not accessible

Meets ADA Accessibility Guidelines for ADA Standard 4.5

TAA Compliant
