

The Lava SSerial-PCI improves your data throughput rates, and saves valuable ISA slot real estate. The most common method of connecting an external peripheral (modem, digital camera, etc.) to a PC is through a serial port. Many PC users want a product that improves connectivity, and solves their real estate problems.

The SSerial-PCI does just that! This PCI bus single 9-pin serial port with 16550 UART supports data throughput rates up to 115.2k bps, saves an ISA slot, and fully supports PCI IRQ sharing. With easy plug-and-play installation, it automatically selects the next available IRQ and COM address; just plug it in and go!

## Features & Benefits

- Improves data throughput rates, and saves valuable ISA slot real estate
- Improves data throughput rates, and saves valuable ISA slot real estate
- Improves data throughput rates, and saves valuable ISA slot real estate
- Improves data throughput rates, and saves valuable ISA slot real estate
- Improves data throughput rates, and saves valuable ISA slot real estate
- Improves data throughput rates, and saves valuable ISA slot real estate

## Specifications

### General Info

Product Line	C2G	UPC Number	757120268048
Country Of Origin	Canada	Application Sector	Residential, Commercial, Industrial
Type	Accessory		

### Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
--------------------------	-----	--------------------------	------------------------------

### Technical Information

Adapter Front	DB9 Male
---------------	----------
