

The Lava Quattro-PCI offers four 16550 UART serial ports on a single PCI card. Ideal for point-of-sale (POS) system applications, it adds four additional COM ports to any PCI-equipped PC. Each port has a maximum data throughput rate of 115.2 kbps. Because of its PCI architecture, the Quattro-PCI allows IRQ sharing and automatically selects the next available IRQ and COM addresses

. Since all four ports share one PCI bus IRQ, even when accessed simultaneously, you save valuable resources for other expansion cards. With easy plug-and-play installation, it automatically selects the next available IRQ and COM address; just plug it in and go! With the Lava Quattro-PCI, you can connect a barcode scanner, credit card reader, cash drawer, and receipt printer to a single card by using a single IRQ.

Features & Benefits

- Allows for four 16550 UART serial ports on a single PCI card
- Allows for four 16550 UART serial ports on a single PCI card
- Allows for four 16550 UART serial ports on a single PCI card
- Allows for four 16550 UART serial ports on a single PCI card
- Allows for four 16550 UART serial ports on a single PCI card
- Allows for four 16550 UART serial ports on a single PCI card

Specifications

General Info

Product Line	C2G	UPC Number	757120268055
Country Of Origin	Canada	Application Sector	Residential, Commercial, Industrial
Type	Accessory		

Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
