

This precision-engineered cable is fully compliant with the DVI standard defined by DDWG (Digital Display Working Group). The DVI-D dual link configuration provides enough bandwidth for resolutions up to 2048 x 1536 pixels and allows high speed digital video transmission up to 9.9 Gbps. 28 AWG copper conductors are individually insulated in foam-polypropylene to minimize crosstalk, and ensure high speed, error-free transmission.

Tri-shielded undermold with dual foil shield and braid shield protects against unwanted EMI/RFI interference. Gold-plated contacts provide full conductivity with no data loss. PC and Mac compatible cable supports hot-plugging of DVI display devices. PC-99 color-coded: white

Please Note: Does not support analog video; only supports digital video signal.

Features & Benefits

24-pin digital video cable with transfer rates up to 9.9 Gbps Perfect for extending a DVI-D cable for better projector or display placement

Available in lengths up to 5m
