

A handy replacement for a lost cable, or a nice spare for the office. Just plug-and-play for many digital camera models, cellphones, MP3 players, PDAs and other mini-USB devices. This cable provides a transfer rate up to 480 Mbps depending upon the peripheral's USB version, and is ideal for transferring pictures from your digital camera to your PC or Mac. Foil and braid shielding reduces EMI/RFI interference and twisted pair construction helps reduce crosstalk thus ensuring high speed, error-free data transfer.

Features & Benefits

- Allows two ST duplex fiber patch cables to join together
- Allows two ST duplex fiber patch cables to join together
- Allows two ST duplex fiber patch cables to join together
