

Enjoy all the detail, color and brightness you expect while delivering one s-video signal to two devices easily and inexpensively. Low loss dual 75 Ohm oxygen-free copper wire and a foam dielectric guarantee the proper characteristic impedance. Individually double-shielded wires combine with an overall aluminum foil and OFC braid shield to eliminate EMI/RFI interference.

With this dual coax design, the black-and-white picture detail information and the chrominance color information are transported on separate pathways. This construction enables improved picture quality when compared to a typical composite cable. In addition to fitting standard 4-pin s-video jacks, this cable also fits most 7-pin jacks found on desktops and laptop that have a TV out jack. Precision-manufactured 24K gold-plated connectors ensure long-lasting picture quality; fully molded connectors provide excellent strain relief to keep your cable working reliably year after year. An ultra-flexible PVC jacket enables easy installation.

Please Note: Results may vary with the use of this passive s-video splitter.

Specifications

General Info

Product Line	C2G	Color	Blue
UPC Number	757120291640	Country Of Origin	China
Type	Cable		

Dimensions

Cable Length	1 ft
